1st Int. Megha-Tropiques Ground Validation Workshop  
Organizers

Dear Sir,

**1st Int. Megha-Tropiques Ground  
Validation Workshop**

I am writing to apply for the 1st Int. Megha-Tropiques Ground Validation Workshop and enclose my CV for your consideration.

As far as my degrees obtained in atmospheric physics are concerned, i am most particularly attached by the emphasis puts on Regional Climate Models. I successfully completed my M.Sc using dispersion model and i now deal with air quality and weather forecast using WRF-3DVar. I will draw your attention to my CV which shows my skills to atmospheric sciences and computer training. I have good skills using Linux systems, programming in Fortran and analysing data using NCL and Matlab. In addition, i install myself the models i use (AERMOD, WRF, RegCM) and the related libraries and compilers.

This training offers me the possibility to share with others scientists worldwide, leading to a wide range of opportunities which i find exciting.

I hope that on consideration of my CV, you will be persuaded of my desire to attend this training program and take advantages with meeting experts.

Yours sincerely

**Signed**

*IGRI MOUDI Pascal*
